

# Technical Architecture & Core Components: Details

## EXA OTP in SAP Environments

### SAP Standard Add-On

- Delivered as an SAP-certified add-on supporting both SAP ERP (ECC 6.0) and SAP S/4HANA.
- Integrates seamlessly without modifying SAP core—ensuring system stability and upgrade safety.

### Deployment Options

- On-Premise deployment via SAP NetWeaver.
- Cloud Deployment via SAP Business Technology Platform (SAP BTP).
- Hybrid Scenarios supported (ECC + S/4HANA coexistence).

### User Interface & Security

- Intuitive, customizable SAP Fiori-based interface (browser-accessible).
- Security managed via standard SAP authorization controls for strong governance and compliance.

### Automated Data Ingestion

- Preconfigured SAP ETL plug-in enables automated, recurring data loads from SAP modules (Finance, Logistics, etc.).
- Supports flat-file uploads for non-SAP data sources.

### High-Performance Processing

- Built on SAP HANA in-memory technology.
- Optimized for large-scale data processing:
  - Group-wide P&L segmentation
  - Analytics & forecasting at SKU level
  - Transfer price-setting with full traceability of calculations

✅ **Key Value:** A scalable, secure, and high-performance platform for operational transfer pricing that integrates seamlessly into SAP environments.
